Management approach

The fund management reflects the investment policy and management models followed by the Banque Cantonale du Valais, while being based on a flexible asset allocation strategy and an international monetary diversification with a predominant exposure to the Swiss franc. It seeks a regular capital increase with low to medium risks by using, according to market configurations, a reasonable share of equities as well as other asymmetric risk management investments.

BCVs / WKB (LU) flex Opportunity is an appropriate vehicle for investors seeking medium and long-term capital gains through a dynamic investment policy, with the CHF as the reference currency.

About the Benchmark Index

Main investment risks

- Market risk : Risk of loss resulting from fluctuations in the prices of financial instruments.
- Liquidity risk : Liquidity problems on the financial markets that may affect purchases and sales of fund positions.
- Credit risk : Risk that a borrower will not repay all or part of its credit on the maturity dates stipulated in the contract signed between the borrower and the lending institution.
- Risk of capital loss : A capital loss occurs if a unit is sold at a price lower than its purchase price. The Sub-fund does not benefit from any capital protection or guarantee.
